APPENDIX H

Background information from the individual PPPM

	Arkaria	Arkatan	Lendikinya	Lepurko	Mti Mmoja	Nanja Sub Village
Response in general about EDUCATION Below: reasons for positive attitude	All participants felt positive about education Maasai children		All positive apart from one man who said not all his children can go to school as some need to stay home to look after the livestock.	All participants felt positive about education Maasai children		
Adapt to the 'new world' –the non-maasai world	YES	YES –they would learn languages and be able to communicate with other people.		YES	YES	YES
Would bring development back to Maasailand	YES	YES		YES especially in context of having an income or trained as a vet		YES
Would be leaders of tomorrow					YES	
Educated children will support parents/family		YES	YES –and the community and other uneducated children	YES	YES	
other benefits:	-a couple of participants stated it was a child's right (rather than livestock keeping).		Two- women remarked on their own ignorance from not having had the chance to be educated.	-one young man (21years old) mentioned that if his child were a girl he would educate her so that she could read for her husband but that he would only send her to school up to Standard 4.	- increased independence of girls,	
Buy water	YES –Arusha trucks	YES Arusha/Duka Bovu trucks	NOT MENTIONED	**YES Duka Bovu and Arusha**	YES	**YES**
Water for household consumption	dams in the rainy season collect water in the dry season often go to Soiminen (on average a 4hr journey for most) as well as Monduli Juu.	small dams in the rainy season In the dry season they all collect water from different dams; Duka Bovu, Itilala and Sepeko as well as from a water tap. .	small dams in the rainy season (and rainwater harvesting) In the dry season they all collect water from different dams; Meserani, Enjoroee, Lenkibure, TMA, Emainete (Monduli Juu) and Hilala	In the rainy season they get water from small dams e.g. Lepurko dam, Losikito, Manyara and other small dams. In the dry season they collect water from dams such as Nadojoitokt, Nongilili (6hrs walk), Lossimingori (3 hrs walk), Lemariayia (3hrs walk), Soiminen (a long walk – sometimes they arrive back at midnight with their donkies) and Megwara	In the rainy season the majority get water from small dams e.g. Nongolili and harvest rain. One participant said she went to Lengibure (a dam 20km away)	In the rainy season they get water from small dams e.g. Loulokwashi. In the dry season some have to walk a 10hour round trip to fetch water, some get from Noongilili (2.5hours walk away) or from Hilala (30minute walk)
No. Bomas had had people move out in past 5 years	4	4	7	6	6	5
